Title: STORAGE CAPACITOR WITH HIGH MEMORY CAPACITY AND LOW SURFACE

IN THE ABSTRACT

Please replace the Abstract with the following rewritten Abstract:

A storage capacitor includes at least one first electrode adjacent to at least one second electrode, whereby a lateral capacity is formed between these electrodes. The electrodes ~~comprise~~include stacks of metal parts and connecting contact elements. The second electrodes can be arranged around the first electrodes, and at least some of the second electrodes can be used jointly with adjacent ones of the first electrodes to form adjacent storage capacitors.
